Reviewer’s report

Title: Getting messier with TIDieR: embracing context and complexity in intervention reporting.

Version: 1 Date: 12 Sep 2017

Reviewer: Garry Tew

Reviewer’s report:

The authors have responded well to all of the reviewers’ comments and improved the focus and quality of the manuscript. I only have a couple of minor comments:

- The wording of the final sentence of the abstract is a bit awkward. Please consider rewording and listing the four recommended changes after "applied health research:"

- point (i) of "case studies" section: delete "IGR" at the end of this sentence?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
