Title: Consolidated Criteria for strengthening reporting of health research involving Indigenous Peoples: The CONSIDER statement

Version: 0 Date: 21 Jul 2019

Reviewer: Alipasha Meysamie

Reviewer’s report:

The manuscript is well prepared but:

There should be considered a criterion related to ethical considerations for justice, beneficence and confidentiality of data specifically in work with indigenous people. There should be a criterion related to the independence of researchers specifically for showing the fairness of assessment, analysis and interpretation without prejudice and other conflicts may be related.

It should be clear in the guideline, these criteria should be used for which type of studies and how. for example is it uniformly applicable for qualitative and quantitative studies?

can it be applicable as the same in clinical trials as observational studies and or for systematic reviews as an example of secondary studies? these topics should be discussed in the manuscript and placed in the guideline.
