Reviewer’s report

Title: Chart Validation of an Algorithm for Identifying Hereditary Progressive Muscular Dystrophy in Healthcare Claims

Version: 1 Date: 11 Jun 2019

Reviewer: Kan Hor

Reviewer's report:

Overall, the authors have addressed the issues this reviewer's concern. The limitations of this manuscript remain but the overall value of the manuscript to the literature though not hugely impactful remains important especially in the rare disease space. The manuscript achieve its purpose in attempting to develop an algorithm to determine the ability to identify patients with MD and though has many limitations can be useful in leading the way to improve patient selection for future outcomes research.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
Please indicate the quality of language in the manuscript:
