Reviewer’s report

Title: Cross-cultural adaptation of the Pain Medication Questionnaire for use in Brazil

Version: 1 Date: 15 Dec 2018

Reviewer: Carlton Dampier

Reviewer's report:

The authors responses are satisfactory. This manuscript will serve as model example of how to conduct cross-cultural validation studies for clinically important questionnaires. The information on item level response will be helpful to clinicians and other investigators who often struggle with understanding how to recognize opioid misuse in a disorder such as sickle cell disease with intermittent acute pain in the context of chronic pain.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
