Reviewer’s report

Title: Graphical comparisons of relative disease burden across multiple risk factors

Version: 0 Date: 13 Jun 2019

Reviewer: Eralp Dogu

Reviewer's report:

This study introduces an alternative method, an alternative graphical comparison of the importance of the risk factors. The suggested plots allow a quick visual assessment of the relative attributable fractions for differing risk factors, as well as risk factor prevalence and disease/risk factor odds ratios. The manuscript is well-written, clear and focused. It includes enough evidence to prove the benefit of the proposed method. I recommend the paper for publication.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
