Reviewer's report

Title: A Patient-Centered Composite Endpoint Weighting Technique for Orthopaedic Trauma Research

Version: 1 Date: 21 Nov 2019
Reviewer: Reviewer 2

Reviewer's report:

PEER REVIEWER ASSESSMENTS:

OBJECTIVE - Full research articles: is there a clear objective that addresses one or several testable research questions? (Brief or other article types: is there a clear objective?)

Yes - there is a clear objective

DESIGN - Is the current approach (including controls and analysis protocols) appropriate for the objective?

Yes - the approach is appropriate

EXECUTION - Are the experiments and analyses performed with sufficient technical rigor to allow confidence in the results?

Yes - experiments and analyses were performed appropriately

STATISTICS - Is the use of statistics in the manuscript appropriate?

Yes - appropriate statistical analyses have been used in the study

INTERPRETATION - Is the current interpretation/discussion of the results reasonable and not overstated?

Yes - the author's interpretation is reasonable

OVERALL MANUSCRIPT POTENTIAL - Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? If not, can further revisions be made to make the work technically sound?

Yes - current version is technically sound

PEER REVIEWER COMMENTS:
GENERAL COMMENTS: Overall impression of the revised manuscript: This is an interesting paper which will attract attention from clinicians, trialists and general methodologists based on its interesting approach to determining the appropriateness of composite end-points for a challenging population to research. Overall, the amendments have improved the paper and address all major concerns addressed.

Authors done well: The authors have address the excellent comments which were raised by the previous reviewers. The authors have produced a methodologically robust paper which has clinical application.

Not meet best practice: Nil of note. I support this paper as it presently stands.

ADDITIONAL REQUESTS/SUGGESTIONS:

The authors should be commended for addressing the comments made by the previous reviewers. The revised version is a strong paper. I have no concerns regarding the methodology addressed and do not feel it appropriate to raise any additional points at this stage in the paper's progress. I support the paper as it currently stands from a methodological and clinical perspective.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
