Title: Norm Values and Psychometric Properties for the German Health Regulatory Focus Scale – Results of a Representative Survey

Version: 1 Date: 21 Feb 2019

Reviewer: Reviewer 2

Reviewer's report:

"REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed the previous reviewer's concerns sufficiently for you to recommend the revised work as a technically sound contribution? No

Reviewer comments: Authors have made substantial improvements in the paper as per the reviewers request; however, the paper is still hard to follow in both the grammar/punctuation and the flow of the manuscript. I do feel that the authors have done a study that could contribute to this area of literature, but as the paper currently reads, it is hard to understand. The format of the paper is also hard to follow with methods, results, etc. in places like introduction and results in the methods."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
