Reviewer’s report

Title: Symptom attributions in patients with colorectal cancer: a population based study

Version: 3 Date: 2 June 2015

Reviewer: Cristina Renzi

Reviewer’s report:

The authors have answered all the points raised during the previous review and the revised manuscript represents an interesting contribution to the literature.

• Discretionary Revisions: Table 1- a column with the total number of subjects per row could be added.
• Minor Essential Revisions: Abstract-The first sentence in the conclusions is not very clear and should be reworded to communicate the message more clearly.
• Major Compulsory Revisions: None

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
