Reviewer’s report

Title: A qualitative study on older primary care patients' perspectives on depression and its treatments - Potential barriers to and opportunities for managing depression

Version: 1 Date: 16 May 2017

Reviewer: Sarah Alderson

Reviewer's report:

Thank you for asking me to review this amended paper on older adults views on depression. The authors have made changes in response to the reviewers comments, or justified their decision where they have been able. I believe the paper reads better and is clearer for these adjustments. I would support publication.

Note: In figure 1, the lines 154-155 - the authors mention that the depression may have been warded off and I think this is confusing terminology. I would suggest amending this to something clearer.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
