Reviewer’s report

Title: The perceived impact of family physicians on the district health system in South Africa: a cross-sectional survey

Version: 0 Date: 19 Sep 2017

Reviewer: Robert Hoffman

Reviewer's report:

A well designed and executed study. Well written and clear.

I am perturbed by a survey based on the subjects selection of the respondents who rate their importance and impact.

I fear this self selection has a positive impact on the results. A control group would seem prudent to prove that self selection of reviewers does not change the review outcome.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
