Reviewer's report

Title: Opportunistic screening with PSA-tests: perceptions about prostate cancer and genetic lifetime risk assessment. A qualitative study

Version: 0 Date: 08 Jul 2017

Reviewer: Wen DENG

Reviewer's report:

Generally, it is an interesting manuscript to read, and conveys some interesting information about men's perception of PCa. If I understand right, in the semi-structured questions, it appeared that there was no deigned question related to knowldeg about the risk associated with the future treatment of PCa. Therefore, it is natural that the interviewed patients focused more on the perceived benifits of the PSA test rather than the risk.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
