Title: Recruiting General Practitioners for palliative care research in primary care: real-life barriers explained

Version: 0 Date: 30 Nov 2018

Reviewer: Carole Parsons

Reviewer's report:

This is an interesting paper reporting an issue which is important for palliative care researchers. Some minor language revisions are necessary, and I have a couple of comments which require consideration by the authors.

1. In the abstract it is not clear that in the Background that the pro-Spinoza project is the one currently being reported

2. In the Methods, please provide further detail to explain mono-disciplinary GP and multidisciplinary GP practices

3. Page 6, line 139-140. Please rephrase this sentence for clarity

4. Page 7, lines 156-157 Please rephrase this sentence for clarity

5. As above for page 10, lines 229-233

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
