Title: Interprofessional Collaboration in Diabetes Care: Perceptions of Family Physicians Practicing in or Not in a Primary Health Care Team

Version: 1 Date: 30 Jul 2018

Reviewer: Mark Harris

Reviewer's report:

The author has responded adequately to the comments in my previous review. However in their response the authors acknowledge that they could not identify if the respondents were in the same practice and thus unable to explore possible cluster effects. This should be acknowledged in the paper as a limitation of the study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
