Title: Feasibility of referral to a therapist for assessment of psychiatric problems in primary care – an interview study

Version: 0 Date: 07 Feb 2018

Reviewer: Stephane Saillant

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

- In the Table 1, it is not clear for me if it concern "patient" or "FP". Can you precise and verify the appropriateness between the texte and the table?

- The difference between the PHCC 1 and 2 are not so clear. It's possible to make some shema for more clear comprehension of the setting. What were exactly the difference and similarity of the two centers? I think that a table/shema will be necessary.

- It exist big difference concerning the profiles of the FP (some are young doctors and some with a lot of year of experience). That is a important limitation.

- Finally, your paper contribute to the comprehension of a better way to work together between the FP and the therapist, that is very instructive. And you have include the perceptions of the patients, very important for make some recommendations for the practice.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
Please indicate the quality of language in the manuscript:
