Title: Variables associated with interprofessional collaboration: A comparison between primary healthcare and specialized mental health teams

Version: 2 Date: 06 Nov 2019

Reviewer's report:

Dear authors,

Thanks again for your thorough revisions.

I commented on how selecting a set of items and changing the answer categories might have an influence on the validity of the measures used. You rebutted that earlier studies suggest these adaptations would have no impact on the validity of the scale. Please integrate this information in your manuscript; I am probably not the only one who would make this remark, and it is always better to anticipate critique.

With this information added, I would say your paper is accepted for publication.

Best,
Kris
