Reviewer’s report

Title: Multimorbidity as a predictor of health service utilization in Primary Care: a registry-based study of the Catalan population

Version: 0 Date: 08 Sep 2018

Reviewer: Reviewer 2

Reviewer's report:

PEER REVIEWER COMMENTS: To view the full report from the academic peer reviewer, please see the attached file.

REVIEWER COMMENTS FROM REPORT: The paper concerns an important topic but the flow of writing can be improved. The methods and results are well written.
1. The study is well conducted as per its objectives,
2. The authors have done well in comparing the many MMA indices,

REQUESTED REVISIONS:
Morbidity measures association with age and gender can be ascertained and appreciated if confidence intervals are provided.

Instead of showing mean and standard deviations alone, if the authors could also provide the 95% confidence intervals of the mean. 95% confidence intervals will help in detecting significant differences between the subgroups directly, should any reader be interested.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
