Reviewer’s report

Title: Acceptability of screening for pregnancy intention in general practice: a population survey of people of reproductive age

Version: 0 Date: 20 Jan 2020

Reviewer: Gesine Weckmann

Reviewer's report:

Suggested edits

Methods

P4 Line 88: …the authors of the paper, who have extensive clinical and research experience in the fields of reproductive health and health promotion.

I recommend, that the authors describe their experience and credentials in more specific terms.

Generally:

I recommend that the authors incorporate the exact wording of the questions asked in the survey either in the manuscript or as supplementary material.

Discussion

The authors should consider incorporating the information, that even in developed countries, high rates of unplanned pregnancies have been described, which underlines the importance of discussing birth control, but constitutes a potentially important limitation of the concept of preconceptional counselling.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No
Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
