**Reviewer’s report**

**Title:** Can patients make heads or tails of Enhanced Primary Health Care (EnPHC)? Experience through their own journey

**Version:** 2  **Date:** 03 Jun 2020

**Reviewer's report:**

Dear Authors, I reviewed your manuscript after your second revision. In respect for the first reviewers, I have done some minor edits that need to be corrected before publication. Most of them are use of language issues and I have given you potential substitutions. Anything that is highlighted in yellow needs to be deleted. I have attached the pdf with my edits.

It appears that you have completed the requests made by previous reviewers. I do have one request at this point. Your figures should be embedded in your document. They are very good and would strengthen your manuscript if you placed them where they are discussed. This may be planned to happen after the reviews have been completed, but I wasn't sure. The same is true for Table 1. I think that good figures and tables improve the readability of a manuscript.

And lastly, I commend you for your work to promote patient-centered medical care in Malaysia. I am sure you realize that change is very slow, but your work can make a difference.
