Reviewer’s report

Title: Risk of uncomplicated peptic ulcer disease in a cohort of new users of low dose acetylsalicylic acid for secondary prevention of cardiovascular events

Version: 2 Date: 16 October 2014

Reviewer: P. Marco Fisichella

Reviewer’s report:

Well done study. Major strength is the statistical analysis.

Comments:
1) please state a clear hypothesis and primary aims.
2) please define "uncomplicated" PUD
3) please state the real value of the study and the real value to the reader. The major findings are well known

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

no conflict of interest
