Reviewer’s report

**Title:** A randomized controlled trial of endoscopic steroid injection for prophylaxis of esophageal stenoses after extensive endoscopic submucosal dissection

**Version:** 1, **Date:** 25 July 2014

**Reviewer:** Hendrik Manner

**Reviewer's report:**

Dear authors,

this is a very interesting paper on an important issue.

There is only two minor comments:

The case number for final analysis was obviously not reached (should have been 16 per group). Please comment on this in the Discussion section, because it weakens the validity of the study.

Also, some endoscopic images would be fine.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

none
