Reviewer’s report

Title: Endoscopic Inside stent placement is suitable as a bridging treatment for preoperative biliary tract cancer

Version: 4 Date: 5 November 2014

Reviewer: Jong Ho Moon

Reviewer’s report:

Authors present a innovative concept in biliary plastic stents for preoperative biliary drainage. It seems that the stent can be also applied in other conditions in addition to preoperative drainage. The manuscript is well revised.

Minor point
1. There are previous studies about inside metallic biliary stents. Please, add discussion and reference.

Gastrointest Endosc. 2012 May;75(5):1080-5

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
