Reviewer’s report

Title: Rare cause of severe anemia due to pyogenic granuloma in the jejunum

Version: 0 Date: 01 Sep 2015

Reviewer: Paul Kelly

Reviewer’s report:

This is a nice description of an interesting case. The inclusion of radiology, endoscopy and histology (including CD31 immunostaining) make this a good case report. Two small points should be addressed in a revised manuscript:

1. There is a non-sentence in the Abstract; all sentences should contain a verb.

2. Reference 4 is incomplete

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
