Reviewer’s report

Title: Endovascular management of hemosuccus pancreaticus, a rare case report of gastrointestinal bleeding

Version: 0 Date: 26 Oct 2015

Reviewer: Shivanand Gamanagatti

Reviewer’s report:

Dear author,

Article is well written, focusing on interventional management of hemosuccus pancreaticus.

Author have used stent graft, to cover the pseudoaneurysm arising from splenic artery. But in majority of institute, accessibility to stent grafts in emergency situation is not feasible.

It would be helpful if the author discusses the alternate modes of treatment other than surgery. for eg

EUS guided thrombin injection or coiling of the segment of splenic artery or use of gule to fill the sac of pseudoaneurysm so that pseudoaneurysm sac is isolated from the main artery.

Also, author should discuss the technical details of stent graft placement, since it is not usually done procedure fro the visceral artery pseudo aneurysms.

Thanking you,

best Regards

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
