Reviewer's report

**Title:** A pilot study of individualized comprehensive treatment for gastric cancer with para-aortic lymph node metastases

**Version:** 5  **Date:** 23 October 2015

**Reviewer:** Christoph Elsing

**Reviewer's report:**

The Quality of the manuscript has clearly improved. There are however still numerous essential Errors. The Treatment protocoll described in the method section of the Abstract (line 40) is different to the protocoll described in the text (122). This is not acceptable. And again there are some incomplete sentences (line 85). This should be corrected.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
