Reviewer’s report

Title: Incomplete ileus and hemafecia as the presenting features of multi-organ involved primary systemic AL amyloidosis: a rare case report

Version: 0 Date: 14 Oct 2016

Reviewer: Arif Cosar

Reviewer’s report:

I think some more information about incidence and prevalence of amyloidosis makes this manuscript more useful.

I did not understand exact cause of active gastrointestinal bleeding necessitating an exploratory laparotomy and resection of pathological ileum.

Treatment schedule and the clinical course of patients are also intriguing.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
