Title: Life-Threatening Bleeding from Gastric Dieulafoy's Lesion in A Pregnant Woman with HELLP Syndrome: A Case Report and Literature Review

Version: 0 Date: 25 Feb 2017

Reviewer: Hung-Hsu Hung

Reviewer's report:

This article, entitled "Life-Threatening Bleeding from Gastric Dieulafoy's Lesion in A Pregnant Woman with HELLP Syndrome: A Case Report and Literature Review", was a rare case of upper gastrointestinal bleeding. The article is generally well organized, but some comments may be considered as follows.

1. The article should be reviewed and revised by a native English speaker.

2. In background (Line 6), the abbreviation of Dieulafoy's lesion (DL) should be presented after Dieulafoy's lesion.

3. In case report (line 42-43), esophagogastroduodenoscopy (EGD) is a better medical term for "upper gastroscopy".

4. In table 1, the first horizontal lines should be removed.

5. Although this is a case report, IRB approval letter from your hospital ethical committee is also required.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
