Reviewer’s report

Title: Hepatitis B Reactivation among 1962 Patients with Hematological Malignancy in Taiwan

Version: 0 Date: 24 Nov 2016

Reviewer: Marcello Persico

Reviewer's report:

My comment will very simple, rapid and concise. Beside the huge number of patients enrolled in this study no new insights are coming out useful for the scientific community not even for clinical practice. Everyone who is expert in hematology understand well the topic and knows how to handle and manage those kind of patients. Priority for publication is very low.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
