Dear Authors,

This is clinical study with gen analysis. The name of the study is APOB codon 4311 polymorphism is associated with hepatitis C virus infection through altered lipid metabolism. Hcv infection and gen polimorphism and lipid metabolizm anomalies investigates in this study. The results are original. HCV infection and the entry into the hepatic cell with gen polimorphism and lipid disturbance results in HCV infection.. I think so that the paper can be published on this journal

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
