Reviewer's report

Title: Recurrent common bile duct stones as a late complication of endoscopic sphincterotomy

Version: 3 Date: 22 Feb 2018

Reviewer: Cheng-Hsin Chu

Reviewer's report:
1. Since this study is a retrospective study. All of existing data presenting in the study will difficult to explain the doubt and reason due to the limitations of time and endoscopic technique.

2. Existing questions we ask, the authors have fully explained the basic results of this study. It is acceptable.

3. In the future, a prospective research may dispel doubt remaining in this study.
Cheng-Hsin CHU

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
Not relevant to this manuscript
Quality of written English
