Title: Bleeding in patients who underwent scheduled second-look endoscopy 5 days after endoscopic submucosal dissection for gastric lesions

Version: 0 Date: 26 Jan 2018

Reviewer: Francesca Galuppini

Reviewer's report:
This is a well-written manuscript about the risk of bleeding after second-look endoscopy (SLE) in the setting of gastric endoscopic submucosal dissection (ESD). Although the work is well conducted and the main concerns are highlighted by the Authors, it does not have a great originality. One of the concern I have is the following: How do the Authors argue the result that antithrombotic drugs affect more on later phase post - ESD bleeding? There are some typos and English could be reviewed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
