Reviewer’s report

Title: A practical guide for probiotics applied to the case of antibiotic-associated diarrhea in The Netherlands

Version: 1 Date: 25 Apr 2018

Reviewer: Lynne Vernice McFarland

Reviewer's report:

An excellent revision from the original. much better now.

Only scientific error is that newer articles now document that the product Bio-K+ contains three (not two) strains of Lactobacillus.

This reported in Auclair J, Frappier M and Millette M. 2015 Clinical Infectious Disease. Newer identification assays found a third strain of Lactobacilli was present in their product from the beginning (so older studies only reported two strains). However, since it's 2018 and this article has been in print for three years, it should have come up in their search!

Please do this last correction.

Thanks

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
