Reviewer’s report

Title: The 1000IBD project: multi-omics data of 1000 inflammatory bowel disease patients; Data release 1

Version: 0 Date: 02 Jul 2018

Reviewer: Shin Takasawa

Reviewer's report:

I found that this is an excellent "protocol paper" and I have no serious criticism regarding its purpose and methodology. I hope new findings that surpass previous results concerning IBD (Ex. Roche-Lima, A. et al. Front. Genet. 9, 116, 2018; Friedman, M.F. et al. Clin. Epidemiol. 10, 671-681, 2018) are soon followed using 1000IBD project data.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
