Reviewer’s report

Title: The 1000IBD project: multi-omics data of 1000 inflammatory bowel disease patients; Data release 1

Version: 1 Date: 15 Nov 2018

Reviewer: Shin Takasawa

Reviewer's report:

I found that this is an excellent "protocol paper" and I have no serious criticism regarding its purpose and methodology. I think that it is more informative for readers if the additional findings (results obtained from the original submission [July, 2018] to the revised version [November, 2018]) are included.

Are the methods appropriate and well described? 
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? 
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? 
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? 
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
