Reviewer’s report

Title: Risk Factors and Long-term Outcome of Disease Extent Progression in Asian Patients with Ulcerative Colitis: A Retrospective Cohort Study

Version: 1 Date: 02 Oct 2018

Reviewer: Vineet Ahuja

Reviewer’s report:

1. The authors have not commented upon one facet of progressive disease:

   How many patients had caecal/periappendiceal patch and was that factor related to progression of the disease?

2. Only 59% of patients were on oral or topical 5ASA’s. As 5ASA’s are the cornerstone of therapy in UC, what were the possible reasons that only 60% of patients were taking 5ASA’s.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
