Reviewer's report

Title: Elevated D-dimer is Associated with Increased 28-day Mortality in Acute-on-Chronic Liver Failure in China: a Retrospective Study

Version: 2 Date: 15 Jan 2019

Reviewer: Gar-Yang Chau

Reviewer's report:

It is a well conducted and presented paper that identifies a potentially important novel marker for the prognosis of acute-on-chronic liver failure. The manuscript is well presented and of interest and can contribute to knowledge of this topic. The authors already addressed questions raised previously by reviewers. I have no particular further comment on it.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
