Reviewer’s report

Title: Crohn’s-like disease in a patient exposed to anti-Interleukin-17 blockade (Ixekizumab) for the treatment of chronic plaque psoriasis: a case report

Version: 0 Date: 23 Jul 2019

Reviewer: Brigida Barberio

Reviewer's report:

The case report entitled "Crohn's-like disease in a patient exposed to anti-Interleukin-17 blockade (Ixekizumab) for the treatment of chronic plaque psoriasis: a case report" by Matthew K. Smith at al. report a very interesting case of 42 year old Caucasian male with treatment-refractory chronic plaque psoriasis who developed a Crohn's-like colitis following a 12 week induction period with Ixekizumab (anti-IL-17 neutralizing antibody).

Overall, the case is well written. I have the following concern:

- It is not reported when the patient performed the latest colonoscopy and how long he has been treated with Infliximab. Please, consider these data into the manuscript.

I have evaluated this case report and I think it should be accepted after minor revision by BMC Gastroenterology.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
