Author's response to reviews:

Dear Editor,

Thank you for the possibility to revise our manuscript entitled: “Histological, immunohistochemical and mRNA gene expression responses in coeliac disease patients challenged with gluten using PAXgene fixed paraffin-embedded duodenal biopsies” (BMGE-D-19-00352).

The manuscript was now further revised and responses to editor's comments are shown item by item below. We hope that the revised manuscript would be acceptable for publication in the BMC Gastroenterology.
Sincerely yours,

Jorma Isola, corresponding author

1. Supplementary Files
   Currently, the supplementary/additional files attached to latest version of the manuscript cannot be opened. Please re-upload these, and ensure they are attached correctly, as they need to be checked for their content.

Response: Files are now re-uploaded.

2. Availability of Data and Materials
   Please clarify where the data generated in your study is located within the manuscript, as currently, it is unclear where the totality of the data generated is situated within the text. As above, if it located within the supplementary files, please ensure they are attached correctly.

Response: The declaration is now clarified and the totality of the data is available from the corresponding author.

3. Role of Funders
   Please note the role(s) of the funding bodies in the design of the study and collection, analysis, and interpretation of data and in writing the manuscript, which should be declared in the Funding section.

Response: This is now declared.

4. Clean manuscript
   At this stage, please upload your manuscript as a single, final, clean version that does not contain any tracked changes, comments, highlights, strikethroughs or text in different colours. All relevant tables/figures/additional files should also be clean versions. Figures (and additional files) should remain uploaded as separate files.

Response: The manuscript is clean.
