Reviewer’s report

**Title:** Application value of nomogram and prognostic factors of gastric cancer patients who underwent D2 radical lymphadenectomy

**Version:** 0  **Date:** 15 Jul 2019

**Reviewer:** Ibrahim Uygun

**Reviewer's report:**

Dear Authors,

This is a clinical research study that is describing a new nomogram and prognostic factors of gastric cancer patients. The manuscript is well designed and written, and well referenced. Finally, this clinical research study in large series patients do add much new insight into the already existing literature on the same subject and do provide new knowledge to the readership. So, the manuscript should be published in BMC Gastroenterology. No other comment.

Best regards.

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.

Unable to assess

**Are the conclusions drawn adequately supported by the data shown?**
If not, please explain in your comments to the authors.

Yes

**Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?**
If an additional statistical review is recommended, please specify what aspects require further
assessment in your comments to the editors.
