Title: Clinical impact of the perioperative management of oral anticoagulants in bleeding after colonic endoscopic mucosal resection

Version: 1 Date: 09 Sep 2019

Reviewer: Yosuke Tsuji

Reviewer's report:

Thank you for considering my comments for the article BMGE-D-19-00579 entitled 'Clinical impact of the perioperative management of oral anticoagulants in bleeding after colonic endoscopic mucosal resection.'

Major comments:

1. Is the conclusion totally accepted by the authors? Certainly, there is no significant difference in bleeding rate between the HBT group and continuous warfarin or one-day skip of DOACs, but it does not directly mean that continuous anticoagulants without HBT did not prevent bleeding. Considering this conclusion, it seems that the perioperative management of anticoagulants should be reconsidered.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
**Quality of written English**
Please indicate the quality of language in the manuscript:
