Reviewer’s report

Title: Nerve Growth Factor and Tropomyosin Receptor Kinase A are Increased in the Gastric Mucosa of Patients With Functional Dyspepsia

Version: 1 Date: 04 Nov 2019

Reviewer: Reviewer 2

Reviewer's report:

PEER REVIEWER ASSESSMENTS:

OBJECTIVE - Full research articles: is there a clear objective that addresses a testable research question(s) (brief or other article types: is there a clear objective)?

Yes - there is a clear objective

DESIGN - Is the current approach (including controls and analysis protocols) appropriate for the objective?

Yes - the approach is appropriate

EXECUTION - Are the experiments and analyses performed with technical rigor to allow confidence in the results?

No - there are minor issues

STATISTICS - Is the use of statistics in the manuscript appropriate?

No - there are issues with the statistics in the study

INTERPRETATION - Is the current interpretation/discussion of the results reasonable and not overstated?

Yes - the author's interpretation is reasonable
OVERALL MANUSCRIPT POTENTIAL - Is the current version of this work technically sound? If not, can revisions be made to make the work technically sound?

Probably - with minor revisions

PEER REVIEWER COMMENTS:

GENERAL COMMENTS:

The study has a clear objective and the experiments are performed well. The analysis of the study are done with adequate number of subjects.

In this manuscript the authors evaluated the expression of nerve growth factor (NGF) and the high affinity receptor for NGF, TrkA, in the gastric mucosa of patients affected by functional dyspepsia (different subtypes). Then the analyzed the possible correlation between the expression of these molecules in different subtypes of the disease.

In the previous round of review cycle, the authors adequately addressed the reviewer's questions and comments. However, few minor issues remained to be corrected to be suitable for publication of the manuscript. Please see below the comments that needs to be addressed.

Figure 2 C, D and E, P values cannot be 0.000. Please update the numbers with appropriate values. If the values are not significant, please update with ns (not significant) otherwise use &gt; or &lt; to indicate the values (such as &gt;0.001).

In general, P values cannot be equal to 0.000, therefore, please replace all p values in figures 1, 2 and 3 with appropriate numbers such an ns (not significant), or use &gt; or &lt; to indicate to indicate the significance.
REQUESTED REVISIONS:

Figure 2 C, D, and E, P values cannot be 0.000. Please update the numbers with appropriate values. If the values are not significant, please update with ns (not significant) otherwise use &gt; or &lt; to indicate the values (such as &gt;0.001).

In general, P values cannot be equal to 0.000, therefore, please replace all p values in figures 1, 2 and 3 with appropriate numbers such an ns (not significant), or use &gt; or &lt; to indicate the significance.

ADDITIONAL REQUESTS/SUGGESTIONS:

In this manuscript the authors evaluated the expression of nerve growth factor (NGF) and the high affinity receptor for NGF, TrkA, in the gastric mucosa of patients affected by functional dyspepsia (different subtypes). Then the analyzed the possible correlation between the expression of these molecules in different subtypes of the disease.

In the previous round of review cycle, the authors adequately addressed the reviewer's questions and comments. However, few minor issues remained to be corrected to be suitable for publication of the manuscript. Please see below the comments that needs to be addressed.

Figure 2 C, D and E, P values cannot be 0.000. Please update the numbers with appropriate values. If the values are not significant, please update with ns (not significant) otherwise use &gt; or &lt; to indicate the values (such as &gt;0.001).

In general, P values cannot be equal to 0.000, therefore, please replace all p values in figures 1, 2 and 3 with appropriate numbers such an ns (not significant), or use &gt; or &lt; to indicate the significance.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No
Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
