Reviewer’s report

Title: Validation of Serrated Polyps (SPs) in Swedish Pathology Registers

Version: 0 Date: 15 Sep 2019

Reviewer: Jessica Yu

Reviewer's report:

The authors validated a Swedish histopathology database for identifying serrated polyps and found it to be highly reliable.

1) In the methods section, it would be helpful to provide additional description of the ESPRESSO dataset particularly the size, linkage to other clinical datasets etc.

2) How were patients with multiple polyps analyzed in the study? Were there patients with more than 1 serrated polyp and if so how did this affect the analysis

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
