Reviewer’s report

Title: Anthropometric, Biochemical and Clinical Assessment of Malnutrition among Egyptian Children with Chronic Liver Diseases: A Single Institutional Cross-sectional Study

Version: 1 Date: 02 Jul 2019

Reviewer: Claudia Mandato

Reviewer's report:

Authors adequately replied to my comments. In addition, I suggest to add the following sentence (reported in the conclusion session) into the Abstract: Our results identified anthropometric arm indicators and MUAC/A measurement as an effective applied methods for assessing nutritional status in CLD children.

Moreover, please add to the abstract the following sentence: Statistical comparison of cases with z scores < -2 SD based on W/H (L) versus arm 14 indicators showed significant differences in MUAC, UAA and AMA (p < 0.001).

Are the methods appropriate and well described? If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
