Reviewer’s report

Title: Gastric schwannoma with giant ulcer and lymphadenopathy mimicking gastric cancer: a case report

Version: 0 Date: 04 Nov 2019

Reviewer: Rishi Bolia

Reviewer's report:

There are a lot of grammatical mistakes. "the bottom of the ulcer is depression.", "computer" Tomography, "peripheral mucous involvement" - to mention a few. Please correct them. What does "peripheral mucous involvement" even mean?

Was an Endoscopic ultrasound considered?

In the discussion, consider discussing how Immunohistochemical staining can differentiate various spindle cell tumors.

Stress upon the fact that - 18F-FDG PET/CT has only a limited role in making preoperative differential diagnosis between benign schwannoma and malignancy.

Mention a few lines about prognosis and follow-up of such patients.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
