Title: Gastric schwannoma with giant ulcer and lymphadenopathy mimicking gastric cancer: a case report

Version: 1 Date: 26 Jan 2020

Reviewer: Quadri Alabi

Reviewer's report:

The authors made significant correction to the initial queries. The English written of the manuscript has improved. Here are my comments:

- I think authors of this manuscript should write this abbreviation " 18F-FDG PET/CT" in full (fluorodeoxyglucose) in the title section.

- The authors need to write more about Gastric Schwannoma and Fluorodeoxyglucose (18F) in the introductory section. Also, there are many researches or case report articles on the Gastric Schwannoma, I will urge the authors of this manuscript to compare their finding to other published articles on Gastric Schwannoma and the significant of Fluorodeoxyglucose (18F), and their main take home finding that make this manuscript different from previously published articles on Gastric Schwannoma. Very important.

- The authors should create a limitation section and explain the limitation of their case study.
