Reviewer's report

Title: 25(OH) D3 alleviate liver NK cytotoxicity in acute but not in chronic fibrosis model of BALB/c mice due to modulations in vitamin D receptor

Version: 0 Date: 20 Sep 2019

Reviewer: Maissa Elraziky

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The aim of the work is not clearly stated as well as the plan of work.

The authors used ALT and SMA as markers of fibrosis while they are markers of hepatocyte injury.

Sample size was not calculated or included.

The interpretation of results is overestimated rushing to conclusions not solidified by the results obtained, creating false cause/effect relationship.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
