Reviewer’s report

Title: Jejunogastric intussusception after Whipple procedure with B-II Reconstruction: a case report

Version: 0 Date: 12 Jan 2020

Reviewer: Andrew Beggs

Reviewer's report:

The authors describe a case of jejunogastric intussusception after Whipples for a Duodenal cancer. Although described before, what sets aside this manuscript from other described cases are the high quality images that accompany it, and for this reason it should be accepted. I would suggest that the authors better annotate the CT with arrows pointing to the JGI with a text description of what it shows as this will help more junior surgeons understand its content.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
