Reviewer’s report

Title: Predictive performances of four frailty screening tools for community-dwelling older people

Version: 3 Date: 07 Aug 2017

Reviewer: Emiel Hoogendijk

Reviewer's report:

Main comment: It is impossible to see what changes have been made, and where in the text the changes can be found.

Please specify in the response to reviewers what changes exactly were made (including line and page number). Now, the authors say nothing concrete, just "change made". That is not enough information.

I also noticed that changes that I asked in previous review rounds have not been incorporated. For example, I asked how and when the instruments (such as the GFI) were translated to French (and validated). In the second review round the authors replied that these details were provided in supplementary data. However, now I cannot find this information in the manuscript and there is no supplementary data other than the response to reviewers.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
