Reviewer's report

Title: Measurement properties, feasibility and clinical utility of the Doloplus-2 pain scale in older adults with cognitive impairment: a systematic review

Version: 0 Date: 23 Aug 2017

Reviewer: Grazia D'Onofrio

Reviewer's report:

This study makes a good effort in trying to review synthesizes previous research on the measurement properties, feasibility and clinical utility of the Doloplus-2 pain scale in older adults with cognitive impairment.

The manuscript has a clear and concise structure. The information is provided in a comprehensible manner and reflects an enormous amount of work. I thank the authors for the interesting study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
