Title: An investigation of factors predicting the type of bladder antimuscarinics initiated in Medicare nursing homes residents

Version: 1 Date: 26 Sep 2017

Reviewer: Philip Toozs-Hobson

Reviewer's report:

Thank you for submitting the revisions. The table I would recommend is one that lists the BAM's included and the columns indicate relative M1-3 effects and then relative strengths and weaknesses of each medication to orientate readers. It could also be cited in the discussion as part of the next part of the overall project and how this may relate to future trial design.

Are the methods appropriate and well described?
