Reviewer’s report

Title: Preoperative medication use and postoperative delirium: A systematic review

Version: 1 Date: 30 Nov 2017

Reviewer: M. Cristina Polidori

Reviewer's report:

The review is important and well-written. The limitations are listed somehow inconsistently at the end (after mentioning limitations the authors start with a new paragraph "this work is not without limitations...", please reformulate.

Although the authors are right regarding lack of evidence on the effect of narcotic in the conclusion section of the text, this expression is quite confusing and it is better to avoid it. The conclusions of the Abstract is clear.

Are the methods appropriate and well described? 
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? 
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? 
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? 
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
